

LIGHTROOM PRESETS

INSTALLATION INSTRUCTIONS | BY HYDROZI

Installation Method 1

At First, you have to download the zip file.

Go to your Downloads folder and unzip the file. Lightroom Presets are normally delivered to your computer as zip files. It will not install as a zip file therefore you should unzip it first.

The uncompressed file will have a *.lrtemplate* extension.

If you are on a Mac, you can simply double-click the zip file to unzip.

On Windows, right-click and choose "Extract All". You have the option to save the presets wherever you choose on your computer. Save them!

To install the presets, Open Lightroom and go to Develop module Presets panel.

On the left side of the screen, in the presets list, right-click on "User Presets" and choose "Import".

Navigate to the folder of unzipped presets select them and press the Import button. They are now installed!

Alternative Installation Method

At First, Download and Unzip the presets.

Open Lightroom. Click Edit. Go down and click Preferences. A new window will pop up. Click Presets Tab. Click "Show Lightroom Presets Folder"

Copy the preset you just downloaded. Go back to where you have downloaded or extracted the preset template or templates, select them, and copy them. You can copy by pressing Ctrl + C or by right-clicking and selecting Copy. If you have downloaded more than one template you may copy them all at once.

Paste the file or files in the User Presets folder inside Develop Presets.

Try your new presets. Import a photo and click Develop. On the Left Side, below the thumbnail of you photo you will see the available presets. Look for and expand "User Presets" to find the presets that you have installed.

Restart Lightroom.

Enjoy !

Compitable with
Lightroom 4,5 & 6

Supported File Formats
RAW | DNG | TIFF
JPEG | PSD

Important Notes:

To achieve high quality output, please try to use High Resolution images. If you use a lower resolution images, you will get comparatively low quality results.

Note that, different photo has different light, exposure, color & texture. Every photo is not suitable for every presets. So, please try to use different photos to find out which one is perfect.

Thanks for your time !
