

First of all, I want to thank you for purchasing this Actions Bundle

## Instructions

Double click the .atn file; Ps automatically adds the action to its library.

## Alternative Method

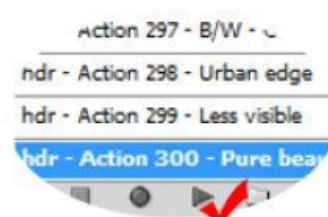

1. Extract the .atn file from the zip in any directory.
2. Open Photoshop. In PS, Go to windows and then click actions.
3. Choose Load Actions from the Actions palette menu. (You will see an arrow pointing right in the top right hand corner in Actions palette menu, click this then click “Load Actions”).
4. Select the action set file from the directory you saved it, And Click load.
5. Open an image. Choose any actions and click-> play button.

LOAD ACTIONS

OPEN YOUR IMAGE

PLAY ANY ACTION  
&ENJOY !

## NOTE

- The results will vary from one photo to the next. Not every photo will look great with every action.
- Experiment with them and you'll get a good feel for which actions work best with certain types of photos.
- Combine effects and adjust their opacity for completely unique results.
- Modify the opacity of the layers or of the main effect folder.
- Each layer can be adjusted and can be hidden, deleted, or adjust the opacity. Feel free to mix it up by turning off layers, running actions on top of each other, and adjusting opacity.

If you have any questions, feel free to message me via Creative Market, I'm happy to answer any questions.
