

First of all, I want to thank you for purchasing these Lightroom Presets

## **Instructions**

Double click the .lrtemplate file; Lightroom automatically adds the Presets to User Presets folder. (Make sure you're in the Development module, you can change it on top of Lightroom's interface)

## **Suggestions**

- The results will vary from one photo to the next. Not every photo will look great with every preset.
- Experiment with them and you'll get a good feel for which preset work best with certain types of photos.
- Change the setting of the preset by moving and dragging the sliders.

If you have any questions, feel free to message me via Creative Market, I'm happy to answer any questions.
